

Company capability statement

Pre-construction termite installation | Commercial pest management

CoWest Australia Pty Ltd supports builders across most of Victoria with pre-construction termite installation for new homes, townhouses, extensions and granny flats. We review the nominated system and drawings, plan work around construction stages and provide project records for handover. We also deliver commercial and general pest management.

MOST OF VICTORIA

Service coverage

\$20M

Public liability insurance

L011714

Victorian pest-control licence

Core services

PRE-CONSTRUCTION TERMITE

Part A and Part B installation, including service penetrations, slab edges and perimeter protection. Scope is matched to the approved drawings, specified system and site conditions.

- New homes, townhouses, extensions and granny flats
- Stage planning before the pour and before access is covered
- Fix-ups and changed details assessed by scope

COMMERCIAL PEST MANAGEMENT

Inspection-led pest management for operating premises, with work planned around access and disruption. Findings, treatment and follow-up are recorded for the responsible team.

- Offices, retail, warehouses and managed properties
- Rodent and insect monitoring and treatment
- Photo-backed findings and practical recommendations

Accredited Part A & Part B installer

Fast certification.

How we work with builders

01 REVIEW

We check the drawings, scope, nominated system and relevant construction stages.

02 PLAN

We agree site readiness, access, price and attendance around the build programme.

03 RECORD

We photograph relevant installation details and prepare agreed handover records.

Direct tender contact Simon Sun | 0447 854 018 | info@cowestaustralia.com.au | cowestaustralia.com.au

WORK SHOWN ON SITE

Selected installation work

Anonymous examples from CoWest site photography. These images show installation details; project names and outcomes are omitted.

SERVICE PENETRATIONS

Protection at grouped services before concrete.

SLAB STAGE

Multiple service areas visible before the pour.

PERIMETER DETAIL

Barrier work at the completed slab edge.

What to send for a price

Project location, drawings and termite specification, nominated product or system, relevant quantities or bill of quantities, the next construction stage and tender closing date. A likely pour date helps when known; an initial enquiry can start without it.

Project documentation and credentials

CoWest can provide licence and insurance details, current installer accreditation evidence, and project-specific installation photographs and handover records as agreed in the scope. Requirements for system selection, inspections, notices and warranty registration are checked against the applicable project documents and manufacturer conditions.

SEND THE TENDER PACKAGE
